

WyeDean

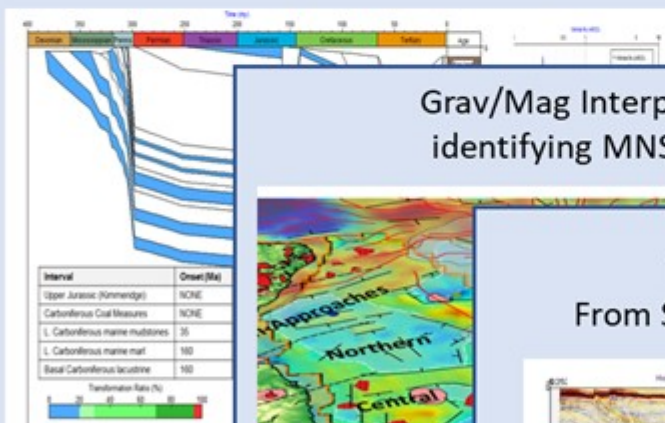

Wyedean Exploration awarding winning **Mid-North Sea High Study**

Winner of the OGA licence round competition this comprehensive report utilises the 2016 broadband set, plus a re-evaluation of well tops and source rock data across the region. The study includes;

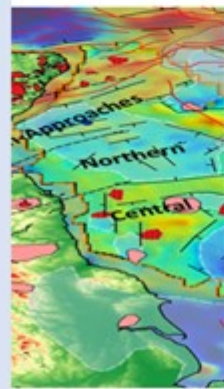

- Regional geological and tectonic review
- Complete well panel correlation and interpretation
- Grav/Mag Interpretation and modelling
- Seismic interpretation framework
- Wyedeans comprehensive well tops and por-perm databases
- Source rock database, petroleum systems overview and 2D modelling
- New Play Identification
